Asetek, Inc.

Dear Mr. Cox:

We have not heard back from you regarding your investigation of Asetek's cease and desist letter to Swiftech. When may we expect your response? Asetek is concerned by Swiftech's continuing infringement of the '764 and '362 patents.

Asetek has spent many years and a great deal of money developing what has become the industry standard for sealed liquid cooling systems. In order to protect this investment, Asetek has worked to protect its innovations with patents and utility models in important countries such as the United States, Europe and China. As I'm sure you're aware, Asetek vigorously enforces its intellectual property rights against infringers and copyists that would profit from Asetek's hard work and investments. Asetek has taken enforcement actions against both Cooler Master and CoolIt in U.S. District Court, as well as against CoolIT in Europe.

Turning to your question, Asetek does not offer licenses to its proprietary technology or intellectual property. Asetek would be willing to discuss the possibility of supplying its integrated pump units to Swiftech and Swiftech could possibly integrate its own radiators, fan and tubes. Please let me know if Swiftech is interested in discussing such an arrangement.

Please contact me directly with any questions you may have.

Sincerely,

Robert F. McCauley
