

## MCW-NBMAX Installation Guide

1. Remove both retention screws from the Asus "Fusion" water-block as shown in Figure 1 then firmly lift the water-block from the motherboard. The block might still adhere to the motherboard because the thermal grease creates a strong bond with the contact area. If necessary, twist the block back and forth until you shake it loose.
2. Clean-off the contact surface with denatured alcohol, or with an electronics degreaser
3. Apply the provided Arctic Céramique thermal compound to the MCW-NBMAX contact surface. Thorough application instructions are available here: [http://www.arcticsilver.com/pdf/appinstruct/cm9/ins\\_cm9\\_intel\\_quad\\_wcap.pdf](http://www.arcticsilver.com/pdf/appinstruct/cm9/ins_cm9_intel_quad_wcap.pdf)
4. Install the MCW-NBMAX onto the contact area, lining up the Swiftech Logo for right-reading as shown in Figure 2, and fasten the block with the provided screws and Allen wrench.

Installation is complete! Always test your system for leaks prior to powering-up your computer!
